

Training Material Guide for TTT Certified Instructors

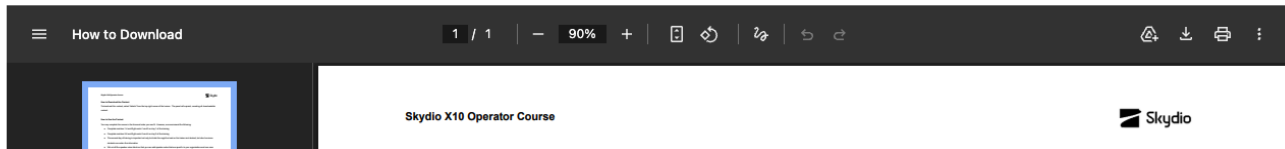

How to Download the Training Materials

1. Click the 'details' or 'download' button at the top-right corner of the page

Skydio X10D [ATO] Instructor Material | 3/3/26

details

6
download

2. A panel will display, revealing all downloadable content

This lesson contains ATO (US mil) X10D instructor materials.

Downloads

- 1. [Skydio X10D ATO - Course Overview.pdf](#)
- 2. [Skydio X10D ATO - Getting Started.pdf](#)
- 3. [Skydio X10D ATO - Flying Skydio X10D.pdf](#)
- 4. [Skydio X10D ATO - Sensor Operations.pdf](#)
- 5. [Skydio X10D ATO - Maintaining Skydio X10D.pdf](#)
- [Skydio X10D ATO - Instructor Material.pdf](#)

3. Click on each file to download it

How to Use the Content

You may deliver the training over the duration and order you see fit. However, we recommend the following:

1. On day 1 of training, complete modules 1-4, and flight cards 1 and 2
2. On day 2 of training, complete the remaining flight cards and the training scenarios
3. It's best to deliver this training over two days to help manage cognitive load on the trainer and students, and to enable better retention of the information
4. The speaker notes are left blank so that you may add notes specific to your organization and use case

Updates to Materials

As training materials are updated, the latest version will be added to this course and an announcement will be sent via email from Skydio Academy to all certified (TTT) instructors to ensure they are using the latest version.
